JONATHAN MESSINA

FULL STACK DEVELOPER

ABOUT ME

Efficiency-driven software developer.

Three years and a half of hands-on experience in multiple fields and projects.

I highly value teamwork and thrive in innovative environments, let's create great projects together!

EXPERIENCE

Full Stack Developer

Metalabs | nov 2022 - oct 2023 | 11 mon

- Developed both web and mobile apps for There app, a San Francisco based startup, a management service for on-site events and conferences including opt-in sharing of live teammate locations, its main focus was on enhancing project coordination and efficiency.
- Maintained and enhanced in-house mobile apps for Android and iOS, utilizing React Native.
- Acquired valuable training in Amazon Web Services (AWS).
- Technologies: React, Node, Nestjs, Typescript, React Native, AWS, Docker, Redux, Jest.

Full Stack Developer

Ultrix Labs LLC | nov 2022 - feb 2023 | 4 mon

- Part-time project, development of a streaming web app employing Typescript, React, Node, AWS, Docker, MySQL.

Full Stack Developer

Brocsoft | mar 2022 - nov 2022 | 9 mon

- Contributed to the development of a B2B ad seller application for Yieldmo, a US-based client, as an integral member of a large international team.
- Techs: React, TypeScript, GraphQL, Apollo, Nestjs, Jest, Cypress, Docker and AWS.

Full Stack Developer

Aqua Home | nov 2021 - feb 2022 | 4 mon

- Part-time position involving the enhancement and maintenance of a multi-section sales platform with multiple integrations. Responsible for optimizing a landing page for external sales, developing a frontend for resellers, and managing backend functionalities
- Techs: React, Typescript, PHP, Laravel, MySQL, Docker, Digital Ocean.

Full Stack Developer

Tower Travel | jun 2021 - mar 2022 | 10 mon

- Full-time role dedicated to the development of 'Holitrends,' a CRM solution tailored for travel agencies. Responsible for coding both the frontend and backend.
- Techs: Vue, Typescript, Laravel, MySQL, AWS.

Full Stack Developer

Tercera Hoja | Jan 2021 - jun 2021 | 6 mon

- Contractor position, was in charge of developing a landing page, e-commerce site and API to feed content to both frontends.
- Techs: React, Typescript, Node, Nestjs, Tailwind, Redux, MySQL, Heroku,

Full Stack Developer

Cam Industries | may 2020 - jan 2021 | 9 mon

- Contractor position, was in charge of developing a web app for a local construction B2B company,
- Techs: React, Typescript, Node, Nestjs, Redux, MySQL, Heroku.

OTHER PROJECTS

- At Brocsoft, I managed, improved, and updated a legacy Java application for a military medical group. This app was integrated with a custom frontline device, serving to aid medical diagnoses and rapid on-site attention.
- I am currently dedicating a few hours to freelance development, collaborating with a colleague on projects for two clients. One client is based in the Caribbean, and the other is in Spain. Both projects utilize Nestjs for backend development and React for the frontend.

EDUCATION

Much of my training has been self learned and tailored to project requirements, I took courses in various platforms, but I predominantly rely on official documentation and collaborative learning with colleagues whenever there's need to learn a new set of tools.

Numen Academy

Numen | jun 2021 - feb 2022 | 6 mon

- Diplomature focused on the MERN stack (MongoDB, Express, React, Node).

San Martin National University

UNSAM | aug 2021 - dec 2022 | 5 mon

- Course with a specialized focus on big data analysis and sorting algorithms.

Polotic Misiones

Polotic | feb 2021 - jul 2021 | 5 mon

- Took part in a course that focused on building full-stack applications. The course covered both relational and non-relational databases
